# *Use Care In Selecting Plans for* **YOUR NEW HOME**

Since building a home involves a major investment, it demands careful planning. You will want a home that keeps your family comfortable in all kinds of weather; a home of beauty, one that utilizes all available space to the best possible advantage.

Homes presented in this book will meet with those requirements, and they are distinctive homes—homes with individuality.

Photographs show how the homes will appear after construction and the miniature floor plans show the size and arrangement of the rooms. But it is impractical to build from a photo and a miniature floor plan alone. You will need complete plans and specifications. To build without definite plans, or with makeshift plans, invites misunderstandings, possibility of costly mistakes and faulty, weak construction.

Architects with many years of experience helping families build homes of maximum quality at minimum expense, have prepared complete, detailed plans on each of the homes described in this book. These tested plans are available to you at the nominal costs shown. All orders are filled promptly.

#### **A set of Garlinghouse plans includes—**

**PLANS**—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot. Also a plot plan in blank, to be filled in locally.

**SPECIFICATIONS**—The specifications explain every detail of the construction of the house from the excavation to the interior decorations.

**LUMBER AND MILL LISTS**—The lumber and mill lists consist of an itemized list of the lumber and mill materials needed to construct the building and stating where each item should be used.

#### **Minor Alterations Can Be Handled by Builder—**

It is impractical to change our tracings to show alterations, but minor alterations in design, material substitutions, etc., can be handled by any competent builder without going to the expense of making up special plans, which usually runs several times the cost of our stock plans.

#### **To Obtain Cost Estimates—**

An estimate of what it would cost to erect any home described in **SELECTED HOMES**, in your locality, may be obtained by taking the photo and floor plan of the home from this book, to local builders for estimates.

#### **All Plans Sent on MONEY BACK Guarantee—**

All Garlinghouse Plans are sent on a "Money Back if You're Not Entirely Satisfied" Guarantee. You have five full days after receiving the plans to study them over and to decide if they will serve your purpose. Plans which are not entirely satisfactory may be returned for prompt exchange or refund.

---

## *Points to Remember When* *Planning or Building a Home*

Be sure the lot you buy is in a neighborhood where you want to live. Check transportation facilities, schools, playgrounds and churches; also possible nuisances such as smoke, noisy traffic.

Find out about the availability of utilities—gas, water, electricity, telephone; mail delivery, rubbish removal, whether or not there are adequate sewers to prevent basement flooding during heavy rains; zoning restrictions which prevent undesirable buildings from being erected on nearby lots.

Make sure the title to the property is clear, have a written contract which gives an accurate description of the property, purchase price, form of deed, time and place of delivery of deed, date you are to obtain possession, clear-cut statement concerning taxes, assessments, etc.

Select a plan of a home that is suited to your family requirements. Be sure the design is in harmony with other homes in the neighborhood, and that it is one which will have resale possibilities, in case you want to sell the prop-

erty at some future date. It's well to avoid freak designs and too many unusual gadgets that you like personally but which might not appeal to other prospective owners.

Keep in mind the fact that the greatest risk you assume in building a home is poor quality of work and material. If it is your intention to award the building contract on price, invite bids only from contractors who are responsible and have a reputation for doing first-class work. Give the contractor your full co-operation. Pay all bills promptly when due. Don't overlook the importance of a waiver of liens.

Shop for a loan as you would in making any other large purchase. Some agencies lend money at a lower rate and offer more desirable terms than others.

Don't obligate yourself for larger monthly payments than you can conveniently meet. Remember that a financial burden that is too heavy may take the pleasure out of home ownership.

# Answers To Your Questions About The FHA Plan of Home Ownership

## 1. What is the FHA-Insured Mortgage Plan?

The Federal Housing Administration insures financial institutions against loss on approved mortgage loans.

## 2. Does the Government Lend the Money?

No. FHA-insured loans are made by private financial institutions approved by the Federal Housing Administration.

## 3. Who May Apply?

Any responsible person with a steady income, good credit, and a reasonable ability to repay the loan.

## 4. To Whom Is Application Made?

To any bank, mortgage, finance or insurance company, savings and loan association, or other financial institution approved by the Federal Housing Administration.

## 5. What Type of Property May Be Financed?

One-to-four family residences.

## 6. What is the Largest Loan Insured?

\$16,000. (As a rule, it is not advisable to build a home costing more than two or two-and-one-half times the buyer's annual income.)

## 7. How Are Loans Repaid?

In monthly installments. Payments on FHA loans at 4½% interest (maximum in U. S.) exclusive of taxes and hazard insurance are:

Payment Time	Monthly Payment
25 years.....	\$ 5.96 per \$1,000
20 years.....	6.73 per 1,000
15 years.....	8.04 per 1,000
10 years.....	10.74 per 1,000

Monthly payments on a \$3,500 loan, for example, would be \$28.14 (3½ times \$8.04), exclusive of taxes and hazard insurance.

## 8. What Does Each Monthly Payment Include?

A portion of the principal, interest (not more than 4½ per cent) and one-twelfth of the annual mortgage insurance premium (one-half of 1 per cent), taxes, fire and other hazard insurance premiums.

### INSURED MORTGAGES UP TO \$5,400.00

## 9. When Must Application Be Made?

The application must be submitted and plans approved before construction is started.

## 10. What Is the Down Payment?

The down payment (cash or lot, or both) may be as low as 10 per cent of the total appraised value in certain cases. For example: On a \$5,000 home, the lender might advance up to 90 per cent. The down payment would be \$500 and the mortgage loan \$4,500.

## 11. How Much Time Is Allowed for Repayment?

For mortgages of \$5,400 or less, 25 years may be allowed.

## 12. What is the Interest Charge?

Not over 4½ per cent, plus one-half of 1 per cent mortgage insurance premium on diminishing balances.

## 13. Must the Borrower Live in the Home?

Yes. The small down payment (10 per cent) and the long term (up to 25 years) apply only to newly constructed, owner-occupied homes.

### INSURED MORTGAGES UP TO \$8,600

## 14. What Is the Down Payment?

On homes owner-occupied and approved before construction is started, an adjustment may be made on the down payment—10 per cent of the first \$6,000 and 20 per cent of the balance up to \$10,000.

## 15. How Much Time Is Allowed for Repayment?

Up to 20 years.

## 16. What Is the Interest Charge?

Not more than 4½ per cent, plus one-half of 1 per cent mortgage insurance premium on diminishing balances.

### INSURED MORTGAGES FROM \$8,600 TO \$16,000

## 17. What Is the Down Payment?

The down payment (cash or lot or both) may be as low as 20 percent of the total appraised value in certain cases.

## 18. How Much Time for Repayment?

Up to 20 years.

## 19. What Is the Interest Charge?

Not more than 4½ per cent, plus one-half of 1 per cent mortgage insurance premium on diminishing balances.
